

# POWER UNION TRUCK PARTS TEST TOOLS

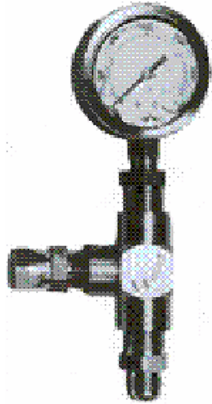

## TC - 4001 Test Loop

The TC-4001 replaces the TC-2001 and is used to determine fluid flow (GPM) and is need to correctly adjust the poppet valves.

The TC - 4001 has been updated to test the steering systems on the new 2007

## **TC- 2002 Gauge Assembly**

The TC-2002 liquid filled gauge assembly is the minimum one needs to correctly set the poppet valves

## **TC- 2003 Fitting Kit**

The TC-2003 fitting kit will adapt the TC-4001 so it can be used to test different steering systems.
